- Wavelength 976-984nm
- High kink-free power
- Proven reliability for high power operation
- Suited for cooled operation
- Compliant with Telcordia GR-468-CORE

Description / Applications:

The Lumics LU0980S220 laser chip on submount contains an optimized GaAs/AlGaAs/InGaAs quantum well high power laser. It has been specifically designed for applications in low noise high power Erbium Doped Fiber Amplifiers (EDFA). The extremely stringent reliability requirements are achieved through our patent pending innovative technology. This includes careful design, exactly defined manufacturing and extensive testing. The qualification contains a set of optoelectronic, thermal and mechanical tests. Each laser chip is individually serialized for traceability and is shipped with a specified set of test data.

(1) Kink-free is defined as $|dL/dl| - \langle dL/dl \rangle < 0.2$, where $\langle dL/dl \rangle$ is the average slope efficiency below kink

(2) Operating current (power) is the maximum current (power) where the slope efficiency does not decrease by more than 20% from average between 1.8x - 3.0x threshold to 120% of the maximum rated output power.

(3) λ_{rms} is defined as 95% power is in the central peak defined as $\pm rms$

Absolute Maximum Ratings:

Parameter	Symbol	Min	Max	Unit
Forward Current	$I_{F,max}$		650	mA
Reverse Voltage	$V_{R,max}$		0.3	V
Storage Temp.	T_{max}	-40	85	°C
Processing Temp. Submount, max.10 sec.	$T_{S,max}$		260	°C
